@CAGTC

Departure Point:

FLORIDA SUGAR
CANE FARM

Sugar cane is harvested in
Florida, placed onto a TRUCK and
taken to a refinery.

Refined sugar is transferred to a TRAIN
for cross-country travel to a
confectionary facility.

Final Destination:

GIFT SHOP,
COOPERSTOWN, NEW YORK

Bubble gum arrives at the National
Baseball Hall of Fame – ready for chewing!

**Don't
blow it!**

A gummed up freight
network hurts the U.S.
economy. Strategic
investment is needed so
our goods don't
get stuck!

Sugar arrives at an Illinois confectionary
facility where it is combined with other
ingredients to produce bubble gum.

Bubble gum is packaged and leaves the
facility by TRUCK.

FREIGHT INFRASTRUCTURE NEEDS ARE MULTIMODAL

Aging and insufficient infrastructure in our metropolitan and rural areas hinders the efficient movement of goods and people resulting in reduced air quality and increased transportation costs. Many metro and rural areas require infrastructure improvements and capacity enhancements to ensure goods reach their intended destination efficiently and with minimal negative impacts on communities.

Freight moves across the country and local negative impacts are felt nationally. Grade separations alleviate congestion, allowing efficient road freight movement and reducing costly delays to consumers and businesses as well as negative health and safety impacts felt by communities traversed by freight traffic.

On-dock rail allows goods to transfer directly from ship to train for direct connection with a distribution network, avoiding extra costly, inefficient movements.

ITS technology maximizes efficient freight movement by enhancing the reliability and security of goods movement.

First and last mile connectors serve significant freight facilities throughout the nation, including highways, seaports, airports, and intermodal terminals. They often link modes and, when sufficiently maintained, provide a smooth transition that results in significant cost and time savings for transportation users.

FEDERAL PRIORITIES

We ask Congress and the Administration to take the following steps:

- Authorize at least \$12 billion annually in dedicated, sustainable, and flexible funding for multimodal freight projects, through INFRA or a similar competitive grant program with merit-based criteria focused on project outcomes;
- Establish a national strategy to guide long-term freight planning and ensure focus and coordination at the Federal level;
- Expedite the development and delivery of projects and activities that improve and facilitate the safe and efficient movement of goods;
- Strengthen freight planning and project development through a partnership with the private sector; and,
- Commit to exploring sustainable sources of revenue across all modes.

COALITION MEMBERS INCLUDE:

Key members of the railroad and trucking industries

Major ports, airports, border communities and trade corridors

Leading transportation trade associations

State and local agencies and individual companies

.....

The **Coalition for America's Gateways and Trade Corridors** (CAGTC) is a diverse coalition of more than 60 public and private organizations dedicated to increasing federal investment in America's intermodal freight infrastructure. In contrast to single mode interests, CAGTC's main mission is to promote a seamless goods movement transportation system across all modes to enhance capacity and economic growth.
